The Associate of Arts degree (A.A.) at JCCC is a general transfer degree and partners with the first two years of most bachelor degree programs. Students pursuing the A.A. may select courses that satisfy both the A.A. degree requirements and lower division requirements for a bachelor's degree at four-year institutions. The 30 hours of electives within the A.A. allow students to complete additional general education and lower division courses required for specific majors. The A.A. degree requires completion of 60 credit hours; please see [JCCC A.A. degree requirements](#). Meeting with a JCCC counselor is strongly recommended for selection of appropriate courses.

Kansas State University's Athletic Training and Rehabilitation Sciences undergraduate degree program prepares students for a career as an allied-health professional and/or entry into graduate professional degree programs such as Athletic Training, Physical Therapy, Physician Assistant and Occupational Therapy. This program is housed in the Department of Food, Nutrition, Dietetics, and Health. The plan of study meets the admission requirements for many health professional programs, specifically the MS in Athletic Training program at Kansas State University. The pre-professional program teaches foundational concepts related to athletic training and rehabilitation sciences with a focus on allowing students to learn to critically apply the knowledge needed to properly manage the health care needs of physically active individuals at all levels and ages. In order to complement classroom learning, pre-professional students must undergo a period of guided observation at clinical sites and a variety of healthcare settings that are both on and off campus. These experiences allow students to gather firsthand knowledge on employment settings and make informed decisions about their future health career options. Examples of healthcare settings that professionals may be working in include: secondary schools, colleges and universities, professional sports, performing arts, military, industrial, sports medicine clinics (both assisting physicians and in rehabilitation) and other healthcare settings.

K-State has proactively developed this degree program to respond to the Athletic Training Strategic Alliances' decision to require a Master's degree to become eligible for certification as an Athletic Trainer. For more information regarding the MS in AT Degree at Kansas State University, please see www.hhs.k-state.edu/fndh/academics/graduate/athletic-training/ for the most current information.

The B.S. in Athletic Training and Rehabilitation Sciences requires 120 hours. **The maximum number of hours from a community college that will be applied toward this degree is 60.** Each student must complete 20 of the last 30 hours of resident credit at K-State. A minimum of 45 hours must be at a course level of 300 or higher.

Note: Grades of "C" or higher are required in all Professional Studies courses.

All K-State students, including transfer students, are required to successfully complete credit-bearing courses/experiences to complete the K-State 8 General Education Program requirements. For information, see www.k-state.edu/kstate8/. Transfer courses evaluated as equivalent to K-State 8 courses can be applied to meet K-State 8 requirements.

It is the STUDENT'S RESPONSIBILITY to check for updates to all transfer information. This transfer guide is provided as a service and is updated as needed. Degree requirements at the four-year colleges are subject to change by those institutions. To ensure you have the most accurate up to date information about the program, it is imperative you meet with an advisor at the transfer institution.

K-State Requirements	Hrs	JCCC Equivalents (Select no more than 60 hours from this list)	Hrs
Communications (8-9 hours)
